

LASER TYPE EXIT LIGHT MODEL NO- LA-400E

Laser Light with an exit sign is a device commonly used in buildings especially commercial and public spaces, to provide illumination and direction in case of power outage or emergencies. These devices are crucial for ensuring the safety of occupants by guiding them towards designated exit during situation where normal lighting might be unavailable.

Our Laser Lights switched on automatically when Light cut it may be normal or in case of emergency, we use a 6 V 1.3 Ah Battery for backup.

Laser lights are used in buildings as a safety precaution to give direction and proper lighting to Exit path, so that people will be able to find their way out of a building or perform their activities without any interruption.

Features and Benefits :
